

WEB BASED AND MOBILE VIRTUAL AND AUGMENTED REALITY SOLUTIONS
2026

Project Name	Think Where You Look
Your Name	Liāna Ozoliņa
Goal	Pixelated WebVR arcade shooter about the attention economy
Target Hardware	PC, WebXR, Meta Quest 2, 3
Visual & Audio Design	
Environment Description	Brightly colored space. Low poly meshes with absurdly overly detailed textures.
Reference Images, Mood Board	 r/blender · 3y ago MilfordMan_ How do I improve this? Roast my Render! 

	 SCORE = 20 SHIPS = 3   The Healthy Mind Platter™ The Healthy Mind Platter, for Optimal Brain Matter™
User Experience	
User Persona, target audience.	Youth overstimulated by online spaces.
User Journey	Step 1: Player enters. The player can move an eye and shoot from it. Step 2: The player shoots at an alarm clock to start the game. Step 3: The player shoots at targets to raise a score. Green targets give points and red ones are big, intrusive and remove points. Step 4: When all the green targets are Shot, the player has their

	final score. Targets disappear. The alarm clock appears again to restart the game.
Interaction Model:	Interaction PC: wasd movement + Click to shoot projectile Interaction VR: Space ship parented to VR gaze+ Trigger to shoot projectile from space ship
Technical Implementation	
Tech Stack	A-frame, Visual Studio Code, HTML, Javascript, ChatGPT, Blender, Adobe Photoshop, Adobe Audition
Assets List	Visuals: eye ball model, sky sphere model, alarm clock, target models (AI, phone, news, yoga girl, relaxing man, heart made of food, bed), text in font "Monoid", A-frame environment preset "starry" Sound: royalty free background music "Friday Keys" Royalty free alarm clock and space laser sound effects Tools/cone: A-frame 1.7.0, A-frame Extras, A-frame Environment Component, A-frame Super Shooter Kit
Calendar (Reached specific goals at the end of day)	10.01.2026 Ship model with a projectile prototype 15.01.2026 The player shoots projectiles at reactive entities. 16.01.2026 Target variety. Point system. Create environment and sound. 22.01.2026 Implemented finalised visuals, audio, target movement
